## HOW INDIAN SCIENTIFIC HELPS SOLVER CUSTOMER'S CHALLENGES & ADD VALUE

Indian Scientific's expert and experienced technical team helps our customers how to improve the quality of products by the use of BIS / ISI, CRS and FSSAI rules and regulations.

Indian Scientific give step by step processes to process the product In hygienic conditions so that our customers get very low rejection due to non-hygienically processed products.

Become stress free as Indian Scientific guide our customers for product safety and quality in details as per BIS / ISI, CRS & FSSAI Regulations.

Indian Scientific's expert technical team guidance on latest update of the new rules & regulations of BIS / ISI, CRS and FSSAI helps our customers to remain at the fore-front of the industry.

Forget the fear of failure as Indian Scientific empower enough our customers to work as a brand in the domestic and international market.

Indian Scientific's expert technical team guide on Laboratory foundation, Testing procedure, Testing record and government Audit for BIS / ISI, CRS and FSSAI Inspections.

Indian Scientific remains updated with latest rules of BIS / ISI, CRS and FSSAI and transfer these updates to our customers in easily executable manner so that they remain tension free.

## WHAT IS ISI MARK?

Whatever a consumer buys, from food to cars, from clothes to electronics, From branded items to non-branded ones, there is always a doubt in mind on how to determine whether they can trust the product or company. Are there any criteria using which one can determine the quality, luxury, or grade of the product that is to be purchased? If there are some parameters, then who decides these? How will your customers know they can trust your brand and its products?

This is where BIS Certification comes into play. BIS Certification (ISI Mark) in India is considered as a mark of trust for the buyers. A BIS Certificate from the Bureau of Indian Standards allows the manufacturers to assure the consumers about product quality, consumer safety, and trustworthiness. BIS Certification Scheme is a voluntary scheme; however, some products are covered under the mandatory certification scheme of BIS.

## WHAT IS FMCS?

Foreign Manufacturers Certification Scheme (FMCS) is a Scheme operated by the Bureau of Indian Standards since year 2000 under Scheme-I of Schedule-II, BIS Act, 2016 and Regulations, 2018 for foreign manufacturers. This scheme enables the overseas applicants/manufacturers to use the standard mark, which is also called ISI Mark, to sell their products in India.

The foreign manufacturers Certification Department (FMCD) is the only eligible authority that can grant BIS Certificate for import to the foreign manufacturers. The major motive of BIS for granting a Manufacturing certificate to Foreign manufactures is that the public gets good quality, safe, reliable and risk-free products.

BIS FMCS Certificate in India from the FMCD department is meant for the manufacturing units located overseas, and which will undergo for factory audit to determine whether the manufacturer is complying with all the necessary requirements illustrated by BIS. It is also mandatory for foreign applicants to nominate Authorized Indian Representative (AIR).

To understand all these steps, let's explore the parameters in detail. So it is mandatory for the foreign manufacturers to obtain a BIS Certificate for Import in India under FMCS Scheme for uninterrupted exporting and selling their products in the Indian market.

## WHAT IS CRS (BIS)

In 2012, the Compulsory Registration Scheme (CRS) was introduced by the Department of Electronics and Information Technology (Deity), jointly with the Bureau of Indian Standards (BIS), to protect Indian consumers from spurious and substandard goods. BIS Registration for Electronics and IT products comes under the compulsory registration scheme. As per this scheme, obtaining BIS registration certification for electronics and IT products is mandatory before launching them into the market.

The Ministry also issued Compulsory Registration Orders, which state that no one shall manufacture or store for sale, sell, import, or distribute goods that do not meet the Indian standards stipulated in the order and do not bear the Standard Mark with a unique registration number.

## WHAT IS FSSAI?

FSSAI is an acronym used for Food Safety and Standards Authority of India, an independent body recognized under the Ministry of Health & Family Welfare, Government of India. FSSAI was formed by Former Union Minister Dr Anbu Mani Rama doss on 5 August 2011 under Food Safety and Standards Act, 2006, which became operational in 2006.

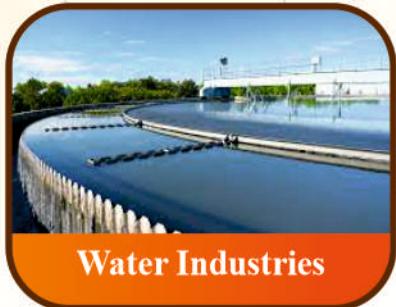

The Food Safety and Standards Act of 2006, which was enacted to promote food cleanliness and quality, has resulted in significant changes in the food business. Delhi, Guwahati, Mumbai, Kolkata, Cochin, and Chennai are among the authority's six regional Offices . According to the Act, no person may start or operate a food business without obtaining an FSSAI license or registration. As a result, any firm that manufactures, processes, packages, or distributes food must now obtain an FSSAI License or Registration.
